Cicor wins orders worth EUR 3 million to manufacture electronic modules for position sensor systems

Zurich, 19 January 2011. The Microelectronics Division of Cicor Group has won three orders worth a total of EUR 3 million. The orders are for the manufacture of highly specialized micro-electronic modules for position sensor systems to be used in the defence industry.

The production process includes making the circuit boards, complex micro-assembly of position and magnetic field sensors, and final calibration and testing. Delivery will be over the course of an 18 month period from the Radeberg facility. This order from the defence electronics sector clearly confirms Cicor Microelectronics Division's status as a leading European and worldwide partner for micro electronics.

About Cicor Technologies • Cicor Technologies is a Swiss group of leading companies in the electronics industry. It is organized into four divisions: Printed Circuit Boards (PCB), Microelectronics (ME), Electronic Solutions (ES) and Asia. The group's companies provide complete outsourcing services and a broad range of technologies for the manufacture of highly complex PCBs, hybrids and electronic modules. With around 1200 employees in 11 production sites in Switzerland and abroad, the group supplies high-quality custom-made solutions to its clients in Europe, America and Asia. The shares of Cicor Technologies Ltd. are listed on the SIX Swiss Exchange (CICN). For more information, please visit www.cicor.com.
